**YOSHIMURA**

# 2010 RM-Z450 / RM-Z250 RMX450Z RACING KIT PARTS

## MX TUNER

FUEL INJECTION & IGNITION TIMING ADJUSTER

RACING USE ONLY

### Specification

Fuel Volume Adjustment : +/-5steps each  
Ignition Timing Adjustment : +/-2degrees  
<Adjustable Range>  
Engine Revolution : 2,000-12,000rpm or All  
Throttle Position : 5%-75% or All

### What is MX Tuner

MX Tuner is a set-up tool which makes it possible to adjust the fuel injection volume and ignition timing by simple way. It offers suitable mapping depending on the engine modifications, circuit conditions or riding style.

### APPLICABLE MODELS

RM-Z450

RM-Z250

RMX450Z

**YOSHIMURA**

**OTHER RACING KIT PARTS**

MX-Tuner

Battery Wire

FI Indicator Light Assy

Power Up Unit

Part No.	Description	Applicable models
431-185-0010	MX-Tuner	RM-Z450L0/RM-Z250L0/RMX450ZL0
36890-28H00	Battery Wire	RM-Z450L0/RM-Z250L0
36380-28H00	FI Indicator Light Assy	RM-Z450L0/RM-Z250L0/RMX450ZL0
446-186-0000	Power Up Unit	RMX450ZL0

RMZ250 / 450L0 : MX Tuner data (new map) can be written without 12V battery while engine is idling. While engine is off, use Battery Wire and 12V battery.

All L0 models : When data is written, it can be confirmed with FI Indicator Light Assy.

**YOSHIMURA PERFORMANCE PARTS : UNDER THE DEVELOPMENT**

**FUEL & IGNITION ADJUSTMENT**

**Setting ranges** (Red box)

**Adjusting ranges** (Blue box)

Setting ranges : Throttle position 5 steps / Engine rev 6 steps  
Fuel injection and ignition timing adjustment can be done separately.

### Functions

- 1 Revolution Dial**  
Adjustment dial to select the engine revolution when fuel volume or ignition timing to be adjusted.
- 2 Throttle Dial**  
Adjustment dial to select the throttle position when fuel volume or ignition timing to be adjusted.
- 3 Adjust Dial**  
Adjustment dial to change the fuel volume.
- 4 Ignition Timing Dial**  
Adjustment dial to change the ignition timing.
- 5 Catch Switch**  
Switch for the operation.
- 6 Write Switch**  
Switch to write the data.
